

Dr. Garrido-Maestu holds a Diploma in Biology (2006), and a Master in Methodologies and Applications in Life Sciences (2010) from the University of Vigo, where he also obtained his Ph.D. (2013). He worked for seven years as an analyst in the Microbiology and Bioassays Laboratory of ANFACO-CECOPECA, where he collaborated in development and evaluation of molecular methods development, for foodborne pathogens detection. After completion of his Ph.D., he moved to the United States to start his postdoctoral training in the Emerging Pathogens Institute (University of Florida, USA) under the supervision of Dr. KC. Jeong, working on the synthesis and evaluation of chitosan nanoparticles for the control of *E. coli* O157 in cattle.
