

MIGUEL XAVIER, MSc, PhD

International Iberian Nanotechnology Laboratory (INL) - Braga, Portugal | Mobile: 00351 92 66 426 33
Birthdate: 16/12/1989 | miguel.xavier@inl.int

Summary

Biomedical Engineer with 7+ years of experience in research. Adept at cell culture, stem cell biology, microfluidics and *in vitro* epithelial models. Highly-motivated researcher with permanent curiosity for knowledge. Excellent communicator who consistently maintains high standards of professionalism and works well on diverse teams. His PhD focused on the development of label-free microfluidic strategies to isolate skeletal stem cells from human bone marrow. Miguel worked as a post-doctoral fellow at the University of Southampton, developing a dynamic Lung-On-Chip with real-time impedance monitoring for and on a project targeting the identification of novel RNA biomarkers of skeletal stem cells using next generation sequencing strategies based on DropSeq. Currently works at the INL within the Food Processing research group towards the development of a new Gut-On-Chip platform.

Professional Skills

- Rapid prototyping, UV photolithography and soft lithography.
- Cell sorting using deterministic lateral displacement.
- Cell sorting using FACS and MACS.
- Microfluidic impedance cytometry.
- Real-time deformability cytometry.
- Next generation sequencing using DropSeq.
- Cell culture (including cell lines, primary cells and stem cells).
- Immunocytochemistry & fluorescence microscopy.
- Knowledge in TEM, NMR spectroscopy and particle characterisation techniques.
- Competent in MatLab, SPSS, GraphPad, ImageJ, CleWin, SolidWorks, and other software.

Professional Experience

Research Fellow **Oct 2018 to Present**

INL - International Iberian Nanotechnology Laboratory – Braga, Portugal

Gut-On-Chip: Development of a modular micro-device for simulation of the human gastrointestinal tract

Visiting Academic **Aug 2018 to Present**

University of Southampton – Southampton, UK

Post-doctoral Research Fellow **Oct 2017 to Aug 2018**

University of Southampton – Southampton, UK.

Lung-On-Chip: Development of a novel 3D microfluidic assay platform for the assessment of human stem cell-derived epithelial function

DropSeq: Identifying the skeletal stem cell for regeneration - harnessing smart nanoparticles and single cell DropSeq molecular profiling platforms

PhD Student – Marie Curie Early Stage Researcher **Sep 2014 to Oct 2017**

Faculty of Physical Sciences and Engineering, University of Southampton – Southampton, UK.

European Union's Seventh Framework Programme project – Label-free Particle Sorting (LAPASO).

Thesis title: Label-free, microfluidic characterisation and sorting of skeletal stem cells.

Visiting Researcher **April and June 2015**

Biotechnology Center, Technische Universität Dresden (TUD) – Dresden, Germany

Real-Time Deformability Cytometry of HL-60, MG-63, whole blood and human bone marrow skeletal stem cells.

Research Fellow **Jan 2013 to Aug 2014**

Instituto de Engenharia Biomédica (INEB), I3S – Porto, Portugal

Developed a comprehensive and reproducible *in vitro* cell-based model of the blood-brain barrier.

Investigated the impact of PAMAM dendrimers on the survival and differentiation of neural stem cells (NSCs), and assessed PAMAM-mediated transfection of NSCs with a BDNF-coding plasmid.

Visiting Researcher **Jan 2014 to Feb 2014**

Centro de Química da Madeira, Universidade da Madeira (CQM) – Funchal, Portugal

Chemical modification of PAMAM dendrimers with poly(ethylene glycol) chains and a fluorescent tag and characterisation using ¹H-NMR spectroscopy.

Curriculum Vitae

Master Student

Jan 2012 to Oct 2012

Instituto de Engenharia Biomédica (INEB)

Thesis title: "Study and development of a model for mimicking the gastric mucosa".

Teaching Experience

Demonstrator – BioNanotechnology course (Univ. of Southampton ELEC 6205) 2014-2017

Soft lithography, surface modification, contact angle, fluorescence microscopy and protein micro-contact printing.

Education

Philosopher's Degree (PhD) Sep 2014 to May 2018

University of Southampton – Southampton, UK.

Thesis title: Label-free, microfluidic characterisation and sorting of skeletal stem cells

Master of Science, BioEngineering Sep 2007 to Oct 2012

Faculdade de Engenharia da Universidade do Porto – Porto, Portugal

Final grade: 16/20 (European Grade A: Top 10% of course students)

High School Degree – Sciences Sep 2004 to Jul 2007

Escola Secundária Martins Sarmiento – Guimarães, Portugal

Final grade: 188/200 (Top 10% of course students)

Languages

- Portuguese (Native).
- English (Cambridge ESOL Certificate of Proficiency in English).
- Spanish (Intermediate knowledge).
- French (Intermediate knowledge).
- German (Basic Knowledge).
- Italian (Basic knowledge).
